American Society for
Dermatologic Surgery

EXPERTISE FOR THE *life* OF YOUR SKIN™

asds.net

news

News of note

The American Society for Dermatologic Surgery reports on consumer trends in medically necessary and cosmetic procedures through two national surveys each year. Watch for press releases, infographic and news videos on asds.net.

The ASDS Survey on Dermatologic Procedures presents the total number of treatments performed by Society members in a variety of categories. The annual survey continues to reveal trends in the subspecialty.

The ASDS Consumer Survey on Cosmetic Dermatologic Procedures annually asks women and men a range of questions about cosmetic procedures to identify what bothers them the most, which procedures they are considering and why they are seeking cosmetic medical procedures.

welcome

Welcome to the 2016-17 ASDS Experts Guide

Writers, editors and producers frequently turn to the American Society for Dermatologic Surgery for insight and information on skin health and beauty.

The 2016-17 ASDS Experts Guide connects those who need to know with those in the know: ASDS member dermatologists – the leaders and pioneers in the field of dermatologic surgery.

Their groundbreaking research has resulted in many important treatments. ASDS members have led the way on skin cancer prevention, detection and treatment, plus procedures to improve scars, remove blemishes and fill lines and wrinkles. From injectables to lasers to cutting-edge therapies, dermatologic surgeons are at the forefront of innovative skin treatments.

This guide contains brief snapshots of 193 ASDS members. Each entry includes availability and contact information (current as of January 2016), plus conditions and treatments in which the member has expertise. Click the QR codes next to member photos to watch video introductions and learn more about their background and expertise.

In addition, members have indicated if they have patients willing to share their stories of skin cancer treatments, cosmetic dermatologic procedures or adverse effects suffered because of treatments performed by a non-physician.

Many physicians request they be contacted via ASDS, and their biographies reflect that. Please call or email ASDS Director of PR, Communications and Marketing Jolene Kremer at 847-956-9133 (jkremer@asds.net). She will be happy to arrange an interview.

This ASDS Experts Guide represents only a fraction of our nearly 6,100 members, all of them well-versed in dermatologic conditions and their treatments. Visit our website, asds.net, for a complete look at dermatologic surgery, skin conditions and treatments as well as skin cancer therapies and prevention.

Newport Beach, Calif.
